Kitchen Warranty

This warranty covers products manufactured by Stewart Scott Cabinetry Ltd, and under the Inside Vision and Facelifters Kitchen brands.

Stewart Scott Cabinetry Ltd (SSC as it will be referred to) warrants that in the manufacturing of its products only high quality workmanship and materials have been employed. SSC undertake to supply products, that are of an acceptable quality and are fit for the purpose that they are intended as outlined under The Consumer Guarantees Act.

If you are a consumer within the terms of the Consumer Guarantees Act 1993 then this warranty is an addition and in no way reduces your statutory rights. Should any defect be discovered regarding either the materials or workmanship within a ten year period from the date of delivery, SSC will at its own cost, repair or replace any faulty products or components at the company's discretion.

Products manufactured by SSC that are on-sold while still within the warranty period will be covered unless sold at auction. SSC will not be liable for a claim on a defective product if a claim has been paid to the previous owner. Items purchased by SSC such as hardware and benchtops are not covered by this warranty but are covered by the manufacturers or importers own warranty and subject to their own terms and conditions which may differ from this document.

This warranty does not cover damage caused by improper installation, misuse, abuse, neglect, excessive wear and tear, improper care and maintenance, water and natural causes such as sunlight, humidity and other environmental conditions.

To validate this warranty please ensure that the details listed are completed and proof of purchase is attached. Please keep these for your records as the purchaser must produce proof of purchase when making a claim.

**10 YEAR
WARRANTY**

Care & Warranty Information

Maintenance and General Care

Cabinetry

Melamine Doors and Carcase

Keeping your melamine surfaces clean is easy. Regular cleaning simply involves wiping with a clean damp cloth.

Stubborn grease and grime

To clean off grimy film, use diluted vinegar and water or sugar soap.

Spills and stains

The most important thing is to catch the stain early. Wiping it with warm soapy

water is the first thing to try.

Foil Wrapped Doors and Panels

While doors and panels are water resistant, they are not water proof. Care should be taken to ensure that they do not have excessive exposure to water, steam or extreme humidity.

Heat Protection

Care should also be taken to protect doors from high temperatures - such as hot implements or heat leaks from faulty appliances.

Spills and stains

Generally you should clean doors with a warm damp cloth which has had the excess water wrung out of it, then remove any remaining moisture with a dry cloth.

Never use the following on either your Melamine or Foil Wrapped doors:

Abrasive cleaners, bleach or similar, scourer pads, wire wool, sand paper, solvents or thinners.

Benchtops

Laminate Surfaces

A damp cloth removes spills and greasy spots. Rub with a clean, dry cloth to bring back brightness. Occasionally clean with warm soapy water. To remove heavy build-up of dirt use Mr Muscle® Surface & Glass, Windex® or Ajax Spray n Wipe spray cleaners. Do not put hot saucepans directly onto your benchtop and do not cut directly on your benchtop.

Engineered Stone and Quartz

Wiping the surface with warm soapy water (a mild detergent) on a regular basis is all that is required. Alternatively use a quality Spray n Wipe spray cleaner. For difficult spills use a non abrasive scotchbrite pad or a non abrasive cleaner. Do not put hot saucepans directly onto your benchtop and do not cut directly on your benchtop.

Granite

Although granite benchtops are sealed they are naturally a porous product. To avoid staining wipe up spills immediately.

Clean regularly with warm soapy water or use Mr Muscle®. Dry with a clean t-towel or paper towel to avoid streaking. A silicone furniture polish will maintain the luster is used every 2 months. Do not put hot saucepans directly onto your benchtop and do not cut directly on your benchtop.

Stainless Steel

Clean regularly with warm soapy water. Satin and brushed finishes can be revitalized with a rub with a scotchbrite pad in the same direction of the grain to remove most scratches.

Resin Surfaces

Warm soapy water or ammonia-based cleaners will remove most dirt and stains.

Timber Surfaces

Spills should be wiped with a damp cloth immediately because moisture may cause damage. Polish with a good quality furniture polish.

Note

Each benchtop will carry its own guarantee and care instructions. It is advisable that you ask for this information upon installation.

Hardware

Drawer Runners and Hinges

Stewart Scott Cabinetry uses only high quality hardware in the manufacture of your cabinetry. General maintenance on any moving parts is not necessary, however, they should be kept free of dirt for smooth operation. Hinges and drawer runners carry their own lifetime guarantee.

Glass & Aluminium Framed doors

Clean glass doors regularly with a good quality window cleaner. Do not use abrasive cleaners as these will scratch the glass.

Kitchen Accessories

Accessories such as pull out pantries, vegetable baskets, cutlery trays and rubbish bins can be cleaned with warm soapy water and a damp cloth. Wipe dry when clean. Keep moving parts free of dirt for smooth operation.

Stainless Steel & Aluminium Appliances

For a smear free finish use a Eurocloth.

Glass Splashbacks

For a smear free finish use a Eurocloth or a good quality glass cleaner.

Notes
